75-METER NET

For the lighter side, tune in the 75-meter Needle Net, which convenes around 7 p.m. daily. . . . Dale Kentner, W2ZX, RCA Broadcast Engineer, and a relatively new "needler" in the 6-year old net extends invitations to any and all newcomers to join in. Only qualification, Dale explains, is to be able to take it—and give it! No need for tfc handling experience . . . the Needle Net devotes itself exclusively to the settling of world problems . . . other Needle Net members include Kenneth Cox, W3VNF, Homer Lotier, W2WVN, operating engineers at WWDC, Washington, D. C., W2MI, W2FMQ, W2AWR, W2AQP, and W2LIR.

DELUXE MOBILE STATION OF THE MILWAUKEE AMATEUR RADIO CLUB

The fine pictures you see on these pages are views of the deluxe mobile radio equipment owned and operated by the Milwaukee Radio Amateurs' Club, Inc. The photos were taken by Kenneth Eggert, W9MOT, club V. P., and forwarded to us by H. Charles Kaetel, W9SNK, Transmitter Engineer at WISN, and Director of Mobile Activities at the club.

You could meet a new face each time you work W9HRM/M, because the club has 250 members, including an OA4, two W1's, a W2, W3, W5, KL7/9 and several WN9's. Beside W9SNK, three other

View looking toward driver's seat shows the 32V2 transmitter, left, and HRO receiver. Antenna tuner can be seen above HRO.

Club's QSL is a beautiful 4-color reproduction of above on a large postcard, with station data and interior views printed on opposite side.

William Gainer, W9SO, W9WCR, and Emmanuel) are Engineers at WISN.

truck was purchased and club. The equipment con- and 150-watt transmitters, one a police receiver), whip ne antennas, and a trailer kw. gas driven generator.

ent can be seen in the wn, however, are two 40- ainless steel masts which site to provide a doublet pe of antenna. The three e network operations with ers in automobiles.
